

don't you want  
an app to log  
**every feature**  
of your **trip** in  
**one place?**

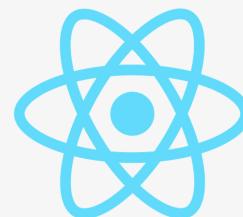

like **journals,**  
**budgets,**  
**photos, maps,**  
**attractions!**

## how to run

1. Download code from [bit.ly/tripdiary](http://bit.ly/tripdiary)
2. Run **npm install** from terminal
3. Run **npm run** from terminal
4. Open using iOS or Android simulator or Expo app on device

## tech stack

### FRONT END

### React Native

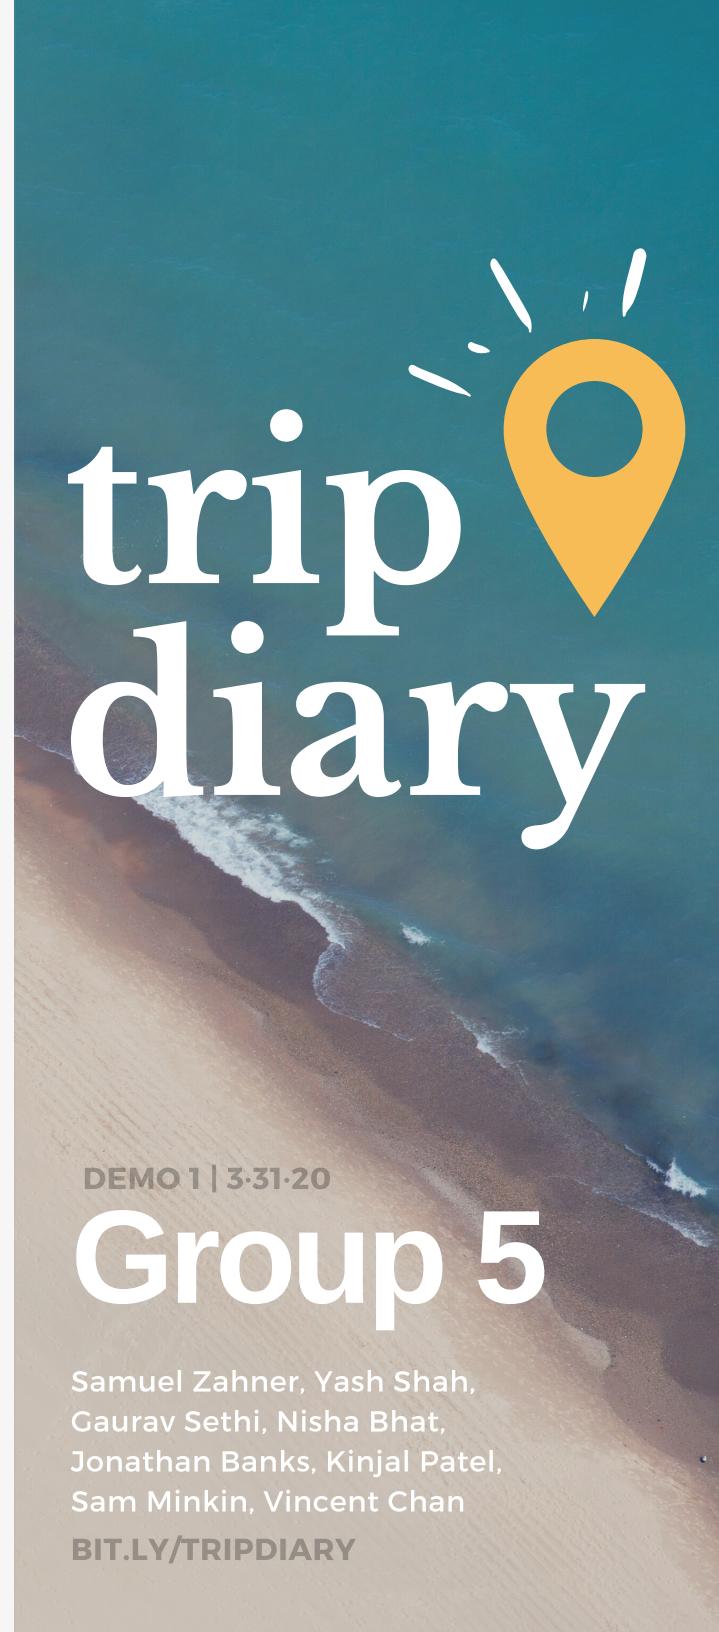

Framework for building  
iOS + Android apps  
using Javascript React

### DATABASE

### Google Firebase

Backend-as-a-Service  
database, used for  
storage (no server  
management)

# trip diary
