

don't you want
an app to log
every feature
of your **trip** in
one place?

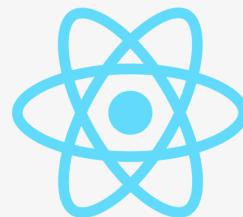

like **journals,**
budgets,
photos, maps,
attractions!

how to run

1. Download code from
github.com/kinjalp516/TripDiary
2. Run **npm install** from terminal
3. Run **npm run** from terminal
4. Open using iOS or Android simulator or Expo app on device

tech stack

FRONT END

React Native

Framework for building
iOS + Android apps
using Javascript React

DATABASE

Google Firebase

Backend-as-a-Service
database, used for
storage (no server
management)

DEMO 2 | 4.29.20

group 5

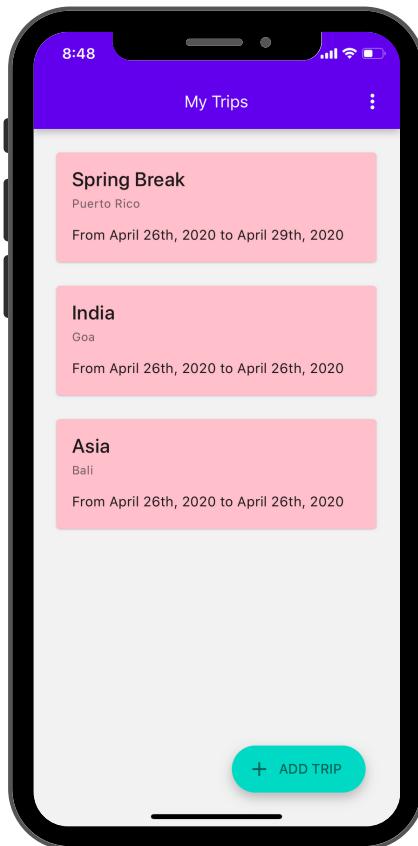

Samuel Zahner, Yash Shah,
Gaurav Sethi, Nisha Bhat,
Jonathan Banks, Kinjal Patel,
Sam Minkin, Vincent Chan

BIT.LY/TRIPDIARY

features

CREATE TRIP DIARIES

MY TRIPS

Add trips taken, creating individual 'trip profiles' to store lasting memories

CALENDAR

View trip dates & daily summaries of what was captured that day

MAP

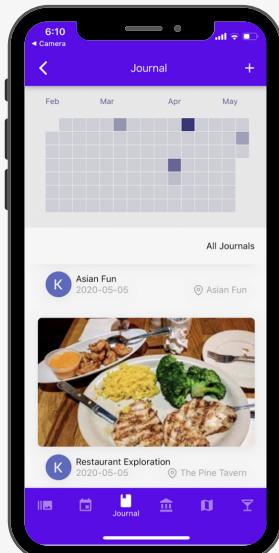

Pin your favorite places to remember where you made memories

PHOTOS

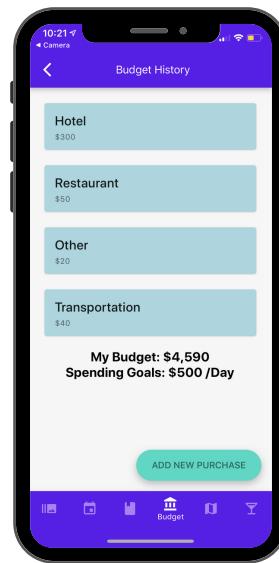

Store & organize your photos by day, trip, & album

JOURNAL

Journal your favorite memories so they don't go forgotten

BUDGET

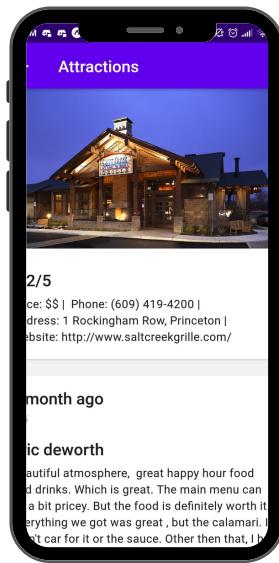

My Budget: \$4,590
Spending Goals: \$500 /Day

ADD NEW PURCHASE

Plan & update your expenses so you can follow a budget

ATTRACTI0NS

Suggestions of attractions for the whole family to have fun

why us?

GENERAL TRAVELLER

- 1 single platform
- 2 cross-functional
- 3 plan + log
